## Preface

### **Introduction:**

This software release notes provide a concise overview of additional features, enhancements and revisions improving production version between 5.4.097 to 5.4.178. This document is designed to be informative only. For guidance on instructional use and implementation of the feature, users should reach out to Maestro Support for assistance or visit <http://www.elearning.maestropms.com> for documentations.

### **Audience:**

This release notes summary is directed to all users of the Maestro PMS software version between 5.4.097 to 5.4.178.001.

### **Advisories:**

Contact [upgrades@maestropms.com](mailto:upgrades@maestropms.com) to schedule an upgrade to version 5.4.178.

When upgrading to the Maestro Version 5.4.178, all users of Maestro Web will have to clear web browser cached history after upgrade is completed.

### **Customer Support:**

To contact Maestro Support:

Call (905) 940-1924

2018-01-30	Updated Front Desk, Spa and Activity, ResWave, Mobile App, Interface, Crystal Report, QlikView/Analytics and Incident Pending Resolution.
2018-01-22	Updated Spa and Activity, Interface, Crystal Report and Incident Pending Resolution.
2018-01-17	Initial release note publication.

## Important Notices

Upgrade to high maestro 5.4 version may require the installation of crystal 2013 reporting which will open all crystal reports in a PDF viewer. All standard crystal reports will be converted and installed however, customized crystal reports will require conversion one report at a time. Installation of Maestro Web will also be required with use of crystal 2013 reporting.

Users of Owners Management and Members Module will encounter a change in Owner statements and Member Statements and may require a statement conversion to crystal 2013 for report printing and emailing of statements. Installation of maestro web on the server for browser use of maestro PMS software will be performed for use of crystal 2013, however maestro web does not have to be used by users. Some requirements and server software installations to expect are as follows:

### Crystal 2013 reporting and System Requirements

- 64-Bit Windows Operating System
- PDF viewer
- Java server JRE edition
- Libre Office (.odt / .doc format for word merge)
- Crystal 2013 report conversions
- Minimum RAM 8GB

### Credit Card EMV Devices

Use of EMV devices at the property may require the maestro PMS software to be upgraded to a high 5.4 version to utilize pin pad devices.

#### Basics of EMV devices

- Entry of the Credit Card via EMV requires “Assign a pin pad” in maestro. Users will be prompted to “Continue / Payment / Authorise” and complete credit card processing via EMV. Once assign pin pad is used, the maestro session would retain that same pin pad unless user logs out or deassigns pin pad manually.
- Manual entry of the credit card in maestro, users must DEASSIGN the pin pad and normal entry of the credit card into maestro and processing can be performed.
- Depending on the credit card processor, alternate steps may be required for manually EMV entry of the credit card. **Please call Maestro Support for assistance.**

### Group Master / Sub Groups Inventory

Use of Group Reservation Master and Sub-Accounts will experience a change in behaviour in regards to the sharing of Inventory. Upgrade to version 5.4.151 or higher, inventory relationship has been enhanced to utilise master inventory to distribute to sub-account inventory blocks. Prior to this, there was no inventory sharing amongst Master and Sub-Account group reservations. **Please call Maestro Support for assistance.**

### Member Module

Use of Primary and Secondary Member Profiles will experience a change in behaviour in regards to Member Status. Upgrade to version 5.4.161 or higher will notice Secondary Member Profiles some fields locked based on Member Status as well as Join/Expiry Date freely open based on unique profile settings outlined as per property. **Please call Maestro Support for assistance.**

## Front Desk

Description	Version	Incident
